

Chico Builders Association

Committed to Building an Affordable Chico

Chico is unique in many ways. Among them, an active and engaged building industry. Chico Builders Association members care about how Chico grows.

We advocate, educate and partner to make building affordable for housing and jobs. Our vision is to make Chico affordable again for families, first time homebuyers, and companies that provide well-paying middle-class careers.

Our members are the local builders, developers, suppliers, architects, engineers, bankers, mortgage lenders and other professionals that make the building industry a huge economic driver in Chico. We work on the current issues of the day to build an affordable Chico.

The Camp Fire destroyed 17% of the Butte County housing. Our understanding of building, development, land use and permitting, is being directed to rebuilding the Ridge, too.

Join with us and support our work. What's in it for you?

- Have a voice in the building, planning and development of Chico
- Improve your knowledge and expertise
- Meet more business leaders involved in local building and economic development
- Better understand the connections between construction issues and a healthy Chico
- Build connections that will make you more effective and productive county-wide

As they say: If you aren't at the table, you're probably on the menu
